Signs that Your Dog Could Be in Need of Massage:

- | | |
|---|--|
| Difficulty jumping into bed or into the car | Lethargic |
| Weakness in the legs | Not wanting to go for a walk or exercise |
| Visible muscle spasms | Favoring one or more legs |
| Acting anxious | Uncharacteristically grumpy |
| Avoiding turning head to one side | Growling or biting when you pick them up or touch them in a certain area |

Warning:

It is important to have your dog examined by a veterinarian before having him or her massaged, or applying low level laser, to rule out more serious causes of disease and discomfort. Ask your veterinarian if your dog is a candidate for massage therapy or low level laser therapy before scheduling.
